

❖ Context

These datasets were created by collecting data from various sources for the required analysis. Dataset consists data of:

- Nifty Midcap 150
- Sector Indices
- Interest Rates
- CPI(Consumer Price index)
- Wholesale Price Index(WPI)
- Domestic and global events that happened around the world from Jan 2008-June 2026.

The data spans from Jan 2008 – June 2026 as during this time period multiple booms & busts have happened which are very much helpful to understand how markets react and work during the surprises.

❖ Datasets & their sources

Dataset	Source
market_index.csv	NSE Historical Data
interest_rates.csv	Investing.com
cpi.csv	MOSPI
wpi.csv	Ministry of commerce website
local_events.csv	Manually Curated

Dataset	Source
events.csv	Manually Curated
Sectors data	NSE Historical Data

❖ Data Quality

Dataset	Data Quality Notes
Market Index	Trading days only; weekends and holidays excluded
Sector Indices	Trading days only
CPI	Monthly releases
WPI	Monthly releases
Interest Rates	Policy announcement dates only
Global Events	Manually curated
Local Events	Manually curated

❖ Joining Keys

Dataset	Join Key
Market Index	Date
Sector Data	Date
CPI	Release Date
WPI	Release Date
Interest Rates	Release Date

Dataset	Join Key
Local Events	Start Date
Global Events	Event Date

❖ Files & Its overview

1. **Market_index.csv:** This dataset contains **Nifty Midcap 150** data over the years as benchmark dataset used to calculate returns, volatility, drawdowns, market regimes and event-study metrics.
2. **Interest_rates.csv:** Contains historical interest rate releases along with consensus forecasts and actual values. The forecasted values are useful to analyses to see how market responds when there is a surprise to the expectation.
3. **Cpi.csv:** This dataset contains consumer price index % value which is useful to track inflation & purchasing powers of the consumers. This contains actual & forecasted results.
4. **Wpi.csv:** This dataset contains wholesale price index % value which is useful to track inflation for the producers of the goods & services. This contains actual & forecasted results.
5. **Sector datasets:** Now during the changes in environment each sector performs differently due to which its important to check how each sector works with changing environment. The sectors whose datasets available are:
 - a. Auto sector
 - b. Banking sector
 - c. Financial services
 - d. IT
 - e. Pharma
 - f. Energy
 - g. Metal
 - h. FMCG

6. **global_events.csv**: Contains manually curated macroeconomic, geopolitical and financial events used for event-study analysis.
7. **local_events.csv**: Contains curated news headlines from local and global event windows used for sentiment analysis.

❖ Datasets Summary:

Dataset	Source	Frequency	Rows	Key Column	Purpose
market_index.csv	NSE	Daily	4565	Date	Benchmark
interest_rates.csv	RBI	Event Based	143	Release Date	Monetary Policy
cpi.csv	MOSPI	Monthly	170	Release Date	Inflation Analysis
wpi.csv	OEA	Monthly	222	Release Date	Producer Inflation
local_events.csv	Curated	Event Based	49	Start Date	Sentiment Analysis
global_events.csv	Curated	Event Based	40	Event Date	Event Study
Sectors_data	NSE	Daily	avg(4561)	Date	Sector Performance

❖ Inventory Report

File Name	Extension	Size (KB)	Rows	Columns	Sample Columns
